Independent Auditors' Report

To the Board of Directors
Wellington Fire Protection District

Opinions

We have audited the accompanying financial statements of the governmental activities, and each major fund of Wellington Fire Protection District, ("the District"), as of and for the year ended December 31, 2024, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund, of Wellington Fire Protection District, as of December 31, 2024, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Wellington Fire Protection District and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Wellington Fire Protection District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that,

individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Wellington Fire Protection District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Wellington Fire Protection District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison schedule for the General Fund, and pension related schedules, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Wellington Fire Protection District's basic financial statements. The other supplementary information, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects, in relation to the financial statements as a whole.

Management's Discussion and Analysis

Wellington Fire Protection District

Management's Discussion and Analysis

Introduction:

Management's Discussion and Analysis is intended to provide the reader and user of our financial statements with a narrative overview of the District's financial activities. Management's Discussion and Analysis (MD&A) should be read in conjunction with the District's financial statements and notes to the financial statements, beginning on page 7.

Overview of the Financial Statements of the District:

The audited financial statements of the District are:

- Statement of Net Position
- Statement of Activities
- Balance Sheet – Governmental Funds
- Statement of Revenues, Expenditures, and Changes in Fund Balance-Governmental Funds
- Notes to the Financial Statements

The financial statements of the District are presented as a special purpose government engaged in government type activities. These financial statements distinguish between the functions of the District that will be principally supported by taxes. The functions of the District include the provision of fire protection services and the preventive mitigation of fire dangers.

The **Statement of Net Position** is prepared using the full accrual basis of accounting, provides information about what is owned (assets) by the District, what is owed (liabilities) by the District, and what is the District's equity in its assets (Net Position). Over time, the comparison of changes in Net Position may provide a useful method of evaluating whether the financial position of the District is improving, deteriorating, or maintaining a status quo.

The **Statement of Activities** provides information about the components – Program Expenses, Program Revenue, General Revenue – of the District's annual operating activities and how those activities affected Net Position.

The **Balance Sheet – Governmental Funds** presents the financial position of the District's funds using the traditional government modified accrual method of accounting, which does not reflect capital assets and debt obligations.

The **Statement of Revenues, Expenditures, and Changes in Fund Balance – Governmental Funds** presents the activities of the District's funds using the modified accrual method of accounting which includes expenditures for capital assets and debt service obligations. This method approximates the reporting on a cash basis and closely follows the budgetary method.

The two reconciliations, which accompany these governmental funds statements, provide explanations of the specific differences in these statements as compared to the Statement of Net Position and the Statement of Activities.

The **Notes to Financial Statements** provide additional, required disclosures about the District, its accounting policies and practices, its financial position and operating activities, and other required information. The information included in these notes is essential to a full understanding of the information contained in the financial statements.

This foregoing information is a summary of the financial information contained in the District's financial statements. For more about the information contained in this condensed, comparative financial information, we recommend a close review of the accompanying audited financial statements beginning on page 7.

Discussion of Financial Position and Operating Activities

The District's Net Position as of December 31, 2024 was \$4,995,835. This is an increase of \$1,398,151 from 2023 due to conservative spending and higher property taxes. Capital expenditures are not expensed in this statement.

Unrestricted cash and cash equivalents of the District at December 31, 2024, totaled \$2,655,479. This is an increase of \$1,720,170 from the prior year due to conservative spending and revenues exceeding expenditures.

Capital Assets, net of accumulated depreciation, of the District at December 31, 2024, totaled \$2,860,828 which represents an increase of \$5,645 from the prior year, after the adjustment as mentioned in note 10 to the financial statements.

General revenues increased in 2024 to \$4,684,710 due to the increase in taxes. See page 8 of the accompanying Financial Statements for details of these revenues and expenses.

Fund Discussion

General Fund balance increased from \$898,646 in 2023 to \$2,241,558 in 2024 due to conservative spending and higher taxes. The fund balance includes \$133,968 for emergencies in accordance with TABOR requirements. The assets and liabilities are comprised primarily of cash, investments and property tax revenues to be realized in 2025. The Impact fee fund balance decreased to \$214,118, a change of \$20,034 due to the payment of debt.

General Fund revenues exceeded expenditures by \$1,342,912, see page 8 of the accompanying financial statements for the details of the revenues and expenditures.

Budgetary Discussion

General Fund revenues for 2024 were \$513,120 more than the final budget. Actual expenditures for 2024 were \$368,767 less than the final budgeted expenditures primarily because of lower spending on wages and benefits, debt service and contingency expenses were not required. See page 26 of the accompanying financial statements for more detail. The budget was not amended for the year and all numbers are compared to the final budgeted amounts. Impact Fund revenues were \$9,466 more than budget and expenditures were the same as budgeted.

Capital Assets and Long-term Obligations

Capital Assets. The District's primary capital assets are buildings and fire suppression equipment. There were \$79,567 in capital additions plus the \$164,323 advance towards the purchase of a new engine. See Note 3 of the Notes to the Financial Statements on page 15.

Long-term Debt. The District entered into a new financed purchase agreement for the purchase of a fire engine. Most of the proceeds were not received until 2025 and the fire engine was not received until January 2025.

Economic Factors and Next Year's Budget. Tax revenue for 2025 should be similar to 2024 since assessed valuation remained constant.

Requests for Information. This financial report is designed to provide a general overview of Wellington Fire Protection District's finances for all those with an interest in the District's finances. Questions concerning any of the information provided in this report or request for additional information should be addressed to the District at 8130 Third Street, Wellington, CO 80549.

Depreciation expense reported in the Statement of Activities does not require the use of current financial resources therefore is excluded from the fund statements.			(238,245)
The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consume the current financial resources of governmental funds. Neither transaction has any effect on net position.			(12,692)
The change in accrued vacation does not provide the use of current financial resources and therefore is not reported in the fund financial statements.			(11,826)
Reduction to deferred inflows of resources related to impact fee credits were not received in cash and therefore are not eligible to be reported as revenues with the funds.			32,560
Changes arising from the change in net pension liabilities and the related deferred inflows and outflows of resources are not current financial resources and are therefore not reported in the fund financial statements.			61,586
Capital outlay to purchase or build capital assets is reported in governmental funds as an expenditure. However, for governmental activities those costs are shown in the Statement of Net Position and allocated over their useful lives.			243,890
Change in Net Position of Governmental Activities			<u>\$ 1,398,151</u>

Wellington Fire Protection District
Notes to Financial Statements
December 31, 2024

Note 1 Summary of Significant Accounting Policies

Financial Reporting Entity

In conformance with Governmental Accounting and Financial Reporting Standards, Wellington Fire Protection District, Wellington, Colorado, (the "District"), is the reporting entity for financial reporting purposes. The District is the primary government financially accountable for all activities of the District within the geographical area organized as the Wellington Fire Protection District. The District meets the criteria of a primary government: its Board of Directors is the publicly elected governing body; it is a legally separate entity; and it is fiscally independent.

In accordance with governmental accounting standards, the District has considered the possibility of inclusion of additional entities in its financial statements. The definition of the reporting entity is based primarily on financial accountability. No other entities have been included in the District's financial statements.

Basis of Presentation

The District's basic financial statements consist of government-wide statements, including a Statement of Net Position and a Statement of Activities, and fund financial statements, which provide a more detailed level of information.

Government-wide Financial Statements

The Statement of Net Position and the Statement of Activities display information about the District as a whole. These statements include the financial activities of the primary government and exclude the activity of funds that are fiduciary in nature.

The Statement of Net Position presents the financial position of the governmental activities at the end of the year. The Statement of Activities presents a comparison between program expenses and the program revenue for each program or function of the District's governmental activities. Program expenses are those that are specifically associated with a service, program or District; and therefore, clearly identifiable to a particular function. Program revenue includes charges paid by the recipient of the goods or services offered by the program, grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues which are not classified as program revenue are presented as general revenue of the District, with certain limited exceptions. The comparison of program expenses with program revenue identifies the extent to which each governmental function is self-financing or draws from the general revenue of the District.

Fund Financial Statements

During the year, the District segregates transactions related to certain District functions or activities in separate funds in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the District at this more detailed level. The focus of governmental fund financial statements is on major funds.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 1 Summary of Significant Accounting Policies (Continued)

Fund Accounting

Accounts of the District are organized on the basis of funds which are considered a separate accounting entity. Both of the following funds are presented as major funds.

General Fund –is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.

Impact Fee Fund- records the activity related to impact fees collected by the District. Impact fees are required to be used on resources related to expansion of the District.

Measurement Focus and Basis of Accounting

Government-wide Financial Statement

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. All assets and liabilities associated with the District are included in the Statement of Net Position.

Fund Financial Statements

All governmental funds are accounted for using a flow of current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet and only revenues that are available within 60 days are recorded in the Statement of Revenues, Expenditures and Changes in Fund Balances. The Statement of Revenues, Expenditures, and Changes in Fund Balances reports on the sources and uses of current financial resources. This approach differs from the manner in which the activities of the government-wide financial statements are prepared. Governmental fund financial statements therefore include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

Revenue

Revenue resulting from exchange transactions, in which each party gives and receives essentially the same value, is recorded on the accrual basis, when the exchange takes place. On a modified accrual basis, revenue is recorded in the fiscal year in which the resources are both measurable and available to finance expenditures, which is typically within sixty days of realization. The transactions are classified as operating revenues.

Non-exchange transactions, in which the District receives value without directly giving value in return, include property taxes, grants, entitlements and donations. Revenue from property tax is recognized in the fiscal year for which the taxes are levied. Revenue from grants, entitlements and donations are recognized in the fiscal year in which all eligibility requirements have been satisfied. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized. These transactions are classified as non-operating revenues.

Property Taxes

The County Treasurer collects and remits property taxes to the District monthly. Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied for the current year prior to December 31 and are payable in full on April 30 of the subsequent year, or in two installments on February 28 and June 15. Property taxes are recorded as receivables and deferred revenue when levied. As taxes are collected, the receivable and deferral are reduced and income is recognized.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 1 Summary of Significant Accounting Policies (Continued)

Expenses/Expenditures

On the accrual basis of accounting, expenses are recognized at the time they are incurred. The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the fund liability is incurred, if measurable. Allocations of costs, such as depreciation and amortization, are not recognized in governmental funds.

Cash and cash equivalents- The District's cash and cash equivalents are considered to be cash on hand, demand deposits and short term investments with maturities of 90 days or less at the date of their acquisition.

Investments – investments are recorded at fair value, which approximates cost.

Receivables – all receivables are reported at their book value and, where appropriate, are reduced by the estimated portion that is expected to be uncollectible. No allowance for doubtful accounts has been established since the District has the right to place a lien on the property to collect the balance due.

Assets and Liabilities

Capital assets –Capital assets are stated at cost or estimated cost. The capitalization threshold for fixed assets is \$5,000. Depreciation over the estimated useful lives of the assets is computed using the straight-line method. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not capitalized. Estimated useful lives are as follows:

<u>Description</u>	<u>Estimated Lives</u>
Land	N/A
Buildings	10-40 years
Fire apparatus and equipment	10-20 years

These assets are reported in the government-wide Statement of Net Position but are not reported in the fund financial statements.

Accrued Liabilities and Long-Term Obligation

All payables, accrued liabilities, and long-term obligations are reported in the government-wide financial statements. In general, governmental fund payables and accrued liabilities that, once incurred, are paid in a timely manner and in full from current financial resources are reported as obligations of the funds. Long-term debt obligations are not recognized as a liability on the governmental fund financial statements but instead are recorded when paid.

Compensated absences represent the accumulated unpaid vacation time accrued by the employees. Upon termination of employment each employee will be compensated for their unused vacation time at their current rate of pay up to 240 hours of unused vacation time. There is no payment for sick time upon termination of employment. In the government fund, unpaid vacation is not expected to be paid from current resources and therefore is not accrued. Unpaid vacation is reported as a liability on the government-wide financial statements. Compensated absences increased during the year, resulting in a net change in compensated absences of \$11,826.

Note 1 Summary of Significant Accounting Policies (Continued)

Deferred Outflows / Inflows of Resources

The District implemented the provisions of GASB No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources and Net Position (GASB 63) and the provisions of GASB No. 65, Items Previously Reported as Assets and Liabilities (GASB 65). As a result, in addition to assets, liabilities and net position, the statement of net position will sometimes report a separate section for deferred outflows of resources and deferred inflows of resources. This separate financial statement element represents a consumption of net position that applies to a future period (deferred outflow) or the acquisition of net position that applies to future periods (deferred inflows).

Net Position

Equity is classified as net position and displayed in three components:

- a. Net investments in capital assets – consists of capital assets including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.
- b. Restricted Net Position – consists of net position with constraints placed on the use either by (1) external groups, such as creditors, grantors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation. The District utilizes restricted net position before utilizing unrestricted net position when an expense is incurred for both purposes.
- c. Unrestricted Net Position – all other net position that does not meet the definition of “restricted” or “net investment in capital assets.” Unrestricted net position is available for future operations or distributions.

Fund Balance

Nonspendable- consists of amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. The nonspendable fund balance was \$15,391 related to prepaid insurance as of December 31, 2024.

Restricted - General Fund - Article X, Section 20 of the Constitution of the State of Colorado (TABOR) requires the District to establish Emergency reserves (see Note 5). A reservation of \$133,968 of the General Fund balance has been made in compliance with this requirement. The District had \$214,118 restricted to the expansion of the District relating to impact fees collected.

Committed- General Fund - Committed fund balance includes those items which can be used for specific purposes pursuant to constraints imposed by formal action of the Board of Directors. Those committed amounts cannot be used for any other purpose unless the Board of Directors formally removes or changes the specified uses. The District had a committed fund balance of \$0 as of December 31, 2024.

Assigned – Includes all amounts that are constrained by the District’s intent to be used for a specific purpose but are neither committed nor restricted.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 1 Summary of Significant Accounting Policies (Continued)

As of December 31, 2024 the assigned fund balance was \$0.

Unassigned- consists of the residual classification for the General Fund. This represents amounts that have not been assigned to other funds and that has not been restricted, committed, or assigned for specific purposes.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

Budgets and Budgetary Accounting

Budgets are adopted on a cash basis except for accrual of current vendor invoices. Annual appropriated budgets are adopted for the fund. All annual appropriations lapse at fiscal year-end.

The District adheres to the following procedures in establishing the budgetary data reflected in the financial statements:

- Budgets are required by state law for all funds. The budget includes proposed expenditures and the means of financing them. All appropriations lapse at year-end.
- Prior to January 31, the budget is adopted by formal resolution.
- Budgets are required to be filed with the State of Colorado within thirty days after the beginning of the fiscal year.
- Expenditures may not legally exceed appropriations at the fund level.
- The District Board must approve revisions that alter the total expenditures of any fund.
- Budgeted amounts reported in the accompanying financial statements are as originally adopted by the District Board or revised by the District Board.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Note 2 Cash and Investments

Cash Deposits

As of December 31, 2024, the District's cash deposits had a carrying balance of \$222,654 with corresponding bank balance of \$224,988, of which \$224,988 is federally insured. The Colorado Public Deposit Protection Act (PDPA) requires that all units of local government deposit cash in eligible public depositories. Eligibility is determined by state regulations. Amounts on deposit in excess of federal insurance levels must be collateralized. The eligible collateral is specified under the PDPA. PDPA allows the institution to create a single collateral pool for all public funds. The pool for all uninsured public deposits as a group is to be uninsured public deposits as a group is to be maintained by another institution or held in trust. The market value of the collateral must be at least equal to 102% of the uninsured deposits. The District did not have any funds collateralized under PDPA as of December 31, 2024.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 2 Cash and Investments (Continued)

The Colorado Divisions of Banking and Financial Services are required by statute to monitor the naming of eligible depositories and reporting of the uninsured deposits and assets maintained in the collateral pools.

Investments

Colorado statutes specify in which investment instruments the units of local government may invest:

- Obligations of the United States and certain United States government agency securities.
- Certain international agency securities.
- General obligation and revenue bonds of United States local government entities.
- Bankers' acceptances of certain banks.
- Commercial paper.
- Local government investment pools.
- Written repurchase agreements collateralized by certain authorized securities.
- Certain money market funds.
- Guaranteed investment contracts.

Custodial Credit Risk – Deposits

Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District's deposit policy is in accordance with State statute. As of December 31, 2024, none of the District's bank deposits were exposed to custodial credit risk.

Interest Rate Risk

Colorado statutes require that no investment may have a maturity in excess of five years from the date of purchase, unless an available active market exists. The District's investment portfolio does not contain investments that exceed that limitation of five years. The Board has adopted an investment policy that conforms to State statutes.

At December 31, 2024, the District had \$2,643,699 invested in the Colorado Local Government Liquid Asset Trust (COLOTRUST) (the Trust), an investment vehicle established for local government entities in Colorado to pool surplus funds. The State Securities Commissioner administers and enforces all State statutes governing the Trust. The Trust offers shares in three portfolios, COLOTRUST PRIME, COLOTRUST PLUS+, and COLOTRUST EDGE.

COLOTRUST PRIME and COLOTRUST PLUS+ - The Trust operates similarly to a money market fund and each share is equal in value to \$1.00. Both portfolios may invest in U.S. Treasury securities and repurchase agreements collateralized by U.S. Treasury securities. COLOTRUST PLUS+ may also invest in certain obligations of U.S. government agencies, highest rated commercial paper and any security allowed under section 24-75-601, C.R.S., as amended.

COLOTRUST EDGE - The Trust operates similarly to a money market fund and each share is equal in value to \$10.00. The portfolio may invest in U.S. Treasury securities and repurchase agreements collateralized by U.S. Treasury securities, certain obligations of U.S. government agencies, highest rated commercial paper and any security allowed under CRS 24-75-601.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 2 Cash and Investments (Continued)

A designated custodial bank serves as custodian for the Trust's portfolios pursuant to a custodian agreement. The custodian acts as safekeeping agent for the Trust's investment portfolios and provides services as the depository in connection with direct investments and withdrawals. The custodian's internal records segregate investments owned by the Trust. COLOTRUST is rated AAAM by Standard & Poor's and is measured at net asset value (NAV). There are no unfunded commitments, the redemption frequency is daily, and there is no redemption notice period.

A summary of cash and cash equivalents at December 31, 2024, is as follows:

Cash deposits	\$ 222,654	Restricted Cash and cash equivalents	\$ 210,374
Colotrust	2,643,699	Unrestricted Cash and cash equivalents	2,655,479
Total cash and cash equivalents	<u>\$ 2,866,353</u>	Total Per the Statement of Net Position	<u>\$2,865,853</u>

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 4 Long-Term Liabilities

Financed Purchase Obligations

On November 15, 2019 the District entered into a financed purchase agreement with a financial institution for the financing purchase agreement of a fire engine totaling \$175,000. The agreement requires six annual payments of \$37,953, principal and interest at 3.44%. The obligation matured on April 15, 2024.

On March 20, 2020 the District entered into a financed purchase agreement with a financial institution for the financing purchase agreement of equipment totaling \$107,300. The agreement requires five annual payments of \$23,359, principal and interest at 2.89%. The obligation matures on March 20, 2025.

On May 15, 2020 the District entered into a financed purchase agreement with a financial institution for the financing purchase agreement of equipment totaling \$119,445. The agreement requires six annual payments of \$24,986, principal and interest at 3.15%. The obligation matures on April 15, 2025.

On September 9, 2024 the District entered into a financed purchase agreement with a financial institution for the financing purchase agreement of a Rosenbauer Custom Pumper with related equipment totaling \$1,300,000. The agreement requires seven annual payments of \$221,201, principal and interest at 3.61%. The obligation matures on April 1, 2031. The funds are disbursed at the time the equipment is received. As of December 31, 2024 there was \$164,323 disbursed under the agreement.

The book value of assets acquired through financed purchase agreement purchases at December 31, 2024 is as follows:

Equipment	\$ 566,068
Less accumulated depreciation	(188,162)
Net Book Value	<u>\$ 377,906</u>

The following are events of default under the above lease agreements: (i) failure to make any lease payment (or any other payment) as it becomes due in accordance with the terms of the lease when funds have been appropriated sufficient for such purpose; (ii) failure to perform or observe any other covenant, condition, or agreement to be performed or observed by it hereunder and such failure is not cured during a stated time period after written notice thereof by the lessor; (iii) the discovery by lessor that any statement, representation, or warranty made by the District in the lease or in writing delivered by lessee is false, misleading or erroneous in any material respect; (iv) proceedings under any bankruptcy, insolvency, reorganization or similar legislation shall be instituted against or by the lessee, or a receiver or similar officer shall be appointed for lessee or any of its property, and such proceedings or appointments shall not be vacated, or fully stayed, within a certain time period after the institution or occurrence thereof; or (v) an attachment, levy or execution is threatened or levied upon or against the equipment.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 4 Long-Term Liabilities (Continued)

In the event of default, the lessors may, at their option: (i) declare all amounts due under the lease; (ii) request the District to discontinue use of the equipment; (iii) sell or lease the equipment; (iv) request the return of the equipment to the lessor; or (v) exercise any other right available under law.

As of December 31, 2024 the District had only drawn \$211,193 therefore the repayment schedule is based only on the amounts drawn as of December 31, 2024. The District expects to draw the remaining amount in 2025.

Loans payable

In 2021, the District entered into an in-kind exchange transaction whereby it received a parcel of land valued at \$600,000 in exchange for credits for future residential impact fees. The owner of the contributed land has already paid \$278,000 toward residential impact fees. As partial consideration for the in-kind contribution, the District will make four annual installments of \$69,500, beginning on September 2021, with the final payment due on September 15, 2024 to offset the District residential impact fees already paid by the owner. The remainder of the value of the in-kind contribution will be used to offset future residential impact fees for the planned development. District residential impact fees that would be incurred by the Owner for development shall be credited up to, but not to exceed, \$321,200. This is recorded as a Deferred Inflow of Resources on the Statement of Net Position. As of December 31, 2024 the loan was paid in full however \$58,560 of impact fees to be waived remained outstanding.

Note 5 Tax, Spending, and Debt Limitation

Article X, Section 20 of the Colorado Constitution, The Taxpayer's Bill of Rights (TABOR), contains several limitations, including revenue raising, spending abilities, and other specific requirements of state and local governments. TABOR is complex and subject to judicial interpretation. The District believes it is in compliance with the requirements of TABOR. Spending and revenue limits are determined based on the prior year's fiscal year spending adjusted for allowable increases based upon inflation and local growth. Fiscal year spending is generally defined as expenditures plus reserve increases with certain exceptions. Revenue in excess of the fiscal year spending limit must be refunded unless the voters approve retention of such revenue.

TABOR requires local governments to establish emergency reserves, which must be at least 3% of fiscal year spending, excluding bonded debt service. Local governments are not allowed to use the emergency reserves to compensate for economic conditions, revenue shortfalls or salary or benefit increases. This District had an emergency reserve of \$ 133,968 as of December 31, 2024.

Note 6 Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disaster. The District maintains commercial insurance to mitigate their risks of loss. Settled claims have not exceeded commercial coverage in any of the past three fiscal years.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans

Volunteer Fireman's Pension Plan

The District has established an agent multiple-employer defined benefit pension plan for volunteer firefighters (the "Plan") as authorized by the State of Colorado statute. The Plan is administered by the FPPA. The annual financial report of FPPA may be obtained by contacting FPPA at 5290 DTC Parkway, Suite 100, Greenwood Village, CO 80111-2721. The plan consists of 17 retirees, 3 active members and 9 inactive non-retired member

Benefits Provided. Any firefighter who has both attained the age of 50 and completed 20 years of active service shall be eligible for a monthly pension. Pro rata pensions would apply to volunteers who reached 50 years of age and had between 10 and 20 years of service. A firefighter, who is disabled in the line of duty and whose disability is of such character and magnitude as to deprive the firefighter of earning capacity which extends beyond one year, shall be compensated in an amount determined by the Pension Board. The Plan also provides for a lump-sum burial benefit upon the death of an active or retired firefighter. Spouses of deceased firefighters may receive benefits as authorized by State statute.

Funding Policy. Actuarially determined contribution rates are calculated as of January 1 of odd numbered years. The contribution rates have a one-year lag, so the actuarial valuation as of January 1, 2022 determined the contribution amounts for 2023 and 2024. The Plan receives contributions from the District in an amount not to exceed one-half mill of property tax revenue. As established by the legislature, the State of Colorado also contributes to the plan. This funding policy results in the expectation that the plan's assets will be able to fully pay for promised benefits through at least 2121. The projections in this report are strictly for the purpose of determining the GASB single discount rate and are different from a funding projection for the ongoing plan. The District contributed \$129,824 to the Plan during the year ended December 31, 2024.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2024, the District reported a net pension liability of \$1,134,379. The net pension liability was measured as of December 31, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2023. For the year ended December 31, 2024, the District recognized pension expense of \$78,358. At December 31, 2024, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans (Continued)

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between actual and expected experience	\$0	\$0
Changes in assumptions	0	0
Net difference between actual and projected earnings on pension plan investments	66,369	0
District contributions subsequent to the measurement date	129,824	0
Total	\$ 196,193	\$0

\$129,824 reported as deferred outflows of resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2025. Deferred outflows / inflows of resources to be amortized are as follows:

Year Ending	Net Deferred Outflows / (Inflows) of Resources
2025	\$ 4,605
2026	21,893
2027	48,072
2028	(8,201)
Total	\$ 66,369

Actuarial assumptions. The total pension liability in the December 31, 2023 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Investment rate of return	7.00 percent, compounded annually net of operating expenses, and including inflation
Projected salary increases	N/A
Cost of Living Adjustment	0.0 percent
Inflation	2.5 percent

Mortality – **Pre-retirement** 2006 central rates from the RP-2014 Employee Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales, and then projected prospectively using the ultimate rates of the scale for all years, 50% multiplier for off-duty mortality.

Post-retirement: 2006 central rates from the RP-2014 Annuitant Mortality Tables for males and females projected to 2018 using the MP- 2017 projection scales, and then projected prospectively using the ultimate rates of the scale for all years. Disabled: 2006 central rates from the RP-2014. Disabled Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales, and then projected prospectively using the ultimate rates of the sale for all years.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans (Continued)

Asset Class	Target Allocation	Long Term Expected Rate of Return
Cash	1%	4.32%
Fixed Income – Rates	10%	5.35%
Fixed Income – Credit	5%	5.89%
Absolute Return	9%	6.39%
Long Short	6%	7.27%
Global Equity	35%	8.33%
Private Markets	34%	10.31%
Total	100%	

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Plans target asset allocation as of December 31, 2023, are summarized in the above table.

Discount rate. The discount rate used to measure the total pension liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Fire & Police Pension Association Board of Director's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the Plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the District's proportionate share of the net pension liability to changes in the discount rate. The following presents the District's net pension liability/(asset) calculated using the discount rate of 7.00 percent, as well as what the District's net pension liability/(Asset) would be if it were calculated using a discount rate that is 1-percentage point lower (6.00 percent) or 1-percentage-point higher (8.00 percent) than the current rate:

	1.00% Decrease*	Current Discount Rate*	1.00% Increase*
District's net pension liability/(asset)	\$1,473,101	\$1,134,379	\$853,849

* The long-term rate of return used was 7.00 percent. The municipal bond rate used was 3.77 percent. The single discount rate for the plans was 7.00 percent.

Pension plan fiduciary net position. Detailed information about the pension plan's fiduciary net position is available in the separately issued Fire & Police Pension Association of Colorado financial report.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans (Continued)

Statewide Retirement Plan

The District contributes to the Statewide Retirement Plan, a cost-sharing multiple-employer defined benefit pension plan administered by the Colorado Fire and Police Pension Association (FPPA). The Statewide Retirement Plan (SRP) provides retirement benefits for members and beneficiaries. Death and disability coverage is provided for members hired prior to January 1, 1997 through the Statewide Death and Disability Plan, which is also administered by the FPPA. This is a noncontributory plan. All full-time, paid police officers of the District are members of the Statewide Retirement Plan and the Statewide Death and Disability Plan. Local revenue sources are responsible for funding of the Death and Disability benefits for firefighters hired on or after January 1, 1997.

Colorado statutes assign the District to establish benefit provisions to the state legislature. FPPA issues a publicly available annual financial report that includes financial statements and required supplementary information for both the Statewide Retirement Plan and the Statewide Death and Disability Plan. FPPA issues a publicly available comprehensive annual financial report that can be obtained on FPPA's website at <http://www.fppaco.org>.

Description of Benefits

A member is eligible for a normal retirement pension once the member has completed twenty-five years of credited service and has attained the age of 55. The annual normal retirement benefit is 2 percent of the average of the member's highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter. Beginning January 1, 2007, the annual normal retirement benefit for the Social Security Component is 1.0 percent of the average of the member's highest three years base salary for each year of credited service up to ten years plus 1.25 percent of the average thereafter.

A member is eligible for an early retirement at age 50 with at least five years of credited service or after 30 years of service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5 percent as interest, returned as a lump sum distribution. Alternatively, a member with at least five years of accredited service may leave contributions with the Plan and remain eligible for a retirement pension at age 55 equal to 2 percent of the member's average highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter.

Contributions

The Plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. Contribution rates for the SRP plan are set by state statute. Employer contribution rates can only be amended by state statute. Member contribution rates can be amended by state statute or election of the membership. Members of the SRP plan and their employers contributing at the rate of 12 percent and 9.50 percent, respectively, of base salary for a total contribution rate of 21.5 percent in 2023. In 2014, the members elected to increase the member contribution rate to the SRP plan beginning in 2016. Member contribution rates will increase 0.5 percent annually through 2023 to a total of 12 percent of base salary. Employer contributions will increase .5 percent annually beginning in 2021 through 2030 to a total of 13.0 percent of pensionable earnings.

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans (Continued)

Contributions to the SRP plan from the District were \$105,426 for the year ended December 31, 2024.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2024, the District reported a liability of \$0 for its proportionate share of the net pension liability (asset). The net pension liability was measured as of December 31, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2022. The District's proportion of the net pension liability was based on the District's share of contributions to the pension plan relative to the contributions of all participating entities. At December 31, 2023, the District's proportion was .1171676975 percent, which was a decrease of .06525 percent from its proportion measured as of December 31, 2022.

For the year ended December 31, 2024, the District recognized pension income of (\$94,302). At December 31, 2024, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between actual and expected experience	\$ 223,139	\$10,721
Changes in assumptions	129,430	0
Net difference between actual and projected earnings on pension plan investments	160,194	0
Net impact in change in proportionate share	511,228	164,302
Contributions subsequent to the measurement date	105,426	0
Total	\$ 1,129,417	\$ 175,023

\$105,426 in total reported as deferred outflows of resources related to pension resulting from District's contributions subsequent to measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2024. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended	Pension Expense
2025	\$ 111,671
2026	159,647
2027	221,343
2028	69,555
2029	89,644
Thereafter	197,108
Total	\$ 848,968

Actuarial Assumptions

The total pension liability in the December 31, 2023 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	Total Pension Liability	Actuarial Determined Contributions
	January 1, 2024	January 1, 2023
Actuarial Method	Entry Age Normal	Entry Age Normal
Amortization Method	N/A	Level % of Payroll, Open
Amortization Period	N/A	30 Years
Long-term Investment Rate of Return*	7.0%	7.0%
Projected Salary Increases*	4.25-11.25%	4.25-11.25%
Cost of Living Adjustments (COLA)	0.0%	0.0%
*Includes Inflation at	2.5%	2.5%

For determining the total pension liability, the post-retirement mortality tables for non-disabled retirees uses the Pub-2010 Safety Healthy Annuitant Mortality Tables projected with the ultimate values of the MP-2020 projection scale. The pre-retirement off-duty mortality tables are adjusted to 60% of the MP-2020 mortality tables for active employees. The on-duty mortality rate is 0.00015.

For determining the actuarially determined contributions, the post-retirement mortality tables for non-disabled retirees uses the Pub-2010 Safety Healthy Annuitant Mortality Tables projected with the ultimate values of the MP-2020 projection scale. The pre-retirement off-duty mortality tables are adjusted to 50% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00015.

At least every five years the FPPA's Board of Directors, in accordance with best practices reviews its economic and demographic actuarial assumptions. At its July 2022 meeting, the Board of Directors reviewed and approved recommended changes to the actuarial assumptions. The recommendations were made by the FPPA's actuaries, Gabriel, Roeder, Smith & Co., based upon their analysis of past experience and expectations of the future. The assumption changes were effective for actuarial calculations beginning January 1, 2023. The actuarial assumptions impact actuarial factors for benefit purposes such as purchases of service credit and other benefits where actuarial factors are used.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2023 are summarized in the following table:

Wellington Fire Protection District
Notes to Financial Statements (Continued)
December 31, 2024

Note 7 Pension Plans (Continued)

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Global Equity	35.00 %	8.33 %
Equity Long/Short	6.00	7.27 %
Private Markets	34.00	10.31 %
Fixed Income - Rates	10.00	5.35 %
Fixed Income - Credit	5.00	5.89 %
Absolute Return	9.00	6.39 %
Cash	1.00	4.32 %
Total	<u>100.00</u>	

Discount Rate

The discount rate used to measure the total pension liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the FPPA Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SRP plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

For the purpose of this valuation, the expected rate of return on pension plan investments is 7.00 percent; the municipal bond rate is 3.77 percent (based on the weekly rate closest to but not later than the measurement date of the "state & local bonds" rate from Federal Reserve statistical release (H.15)); and the resulting single discount rate is 7.00 percent.

Regarding the sensitivity of the net pension liability/(asset) to changes in the single discount rate, the following presents the plan's net pension liability/(asset), calculated using a single discount rate of 7.00 percent, as well as what the plan's net pension liability/(asset) would be if it were calculated using a single discount rate that is one percent lower or one percent higher:

Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate The following presents the District's proportionate share of the net pension liability (asset) calculated using the discount rate of 7.00 percent, as well as what the District's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (6.00 percent) or 1-percentage-point higher (8.00 percent) than the current rate:

<u>Discount Rate:</u>	<u>6.00%</u>	<u>7.00%</u>	<u>8.00%</u>
Proportionate share of the net pension liability (asset)	<u>\$ 657,005</u>	<u>\$0</u>	<u>\$0</u>

Note 7 Pension Plans (Continued)

Pension Plan Fiduciary Net Position

Detailed information about the SRP's fiduciary net position is available in FPPA's comprehensive annual financial report, which can be obtained at <http://www.fppaco.org>.

Note 8 Voluntary Investment Program

Description. Effective May 1, 2010 employees of the District who are members of the SRP (see Note 8) may voluntarily contribute to the Voluntary Investment Program ("457 Plan"), an Internal Revenue Code Section 457 defined contribution plan administered by FPPA. Plan participation is optional, and contributions are separate from others made to FPPA. Title 24, Article 51, Part 14 of the CRS, as amended, assigns the authority to establish the 457 Plan provisions to the State Legislature.

Funding Policy. The 457 Plan is funded by voluntary member contributions of up to a maximum limit set by the IRS (\$22,500 for the calendar year 2024). Catch-up contributions up to \$7,500 for 2024 were allowed for participants who had attained age 50 before the close of the plan year, subject to the limitations of IRC §414(v). For the years ended December 31, 2024 and 2023-member pre- tax contributions were \$35,330 and \$30,353, respectively.

Note 9 Commitments and Contingencies

In 2014, it was identified that during the years 2001-2014 the District over collected property taxes. The District hired an accounting firm to recompute the property taxes based on the appropriate mill levy at the time. As a result, the firm determined the amount of the excess collections to be \$890,000. The District made the decision to begin rebating this amount to taxpayers through a voluntary temporary mill levy reduction in an amount determined annually by the board of directors. There is not a formal repayment schedule in place as amounts are considered to be voluntary repayments at the discretion of the board. As of December 31, 2024 the balance remaining was \$284,283.

Note 10 Prior Period Adjustment

As of December 31, 2023 the land value on the State Highway 1 parcel and the related impact fees to be waived were overstated by \$64,280. Had these amounts been properly recorded, the land value and the deferred inflows – impact fees would have had balances of \$731,286 and \$91,120, respectively, on the Statement of Net Position. There would have been no effect on the change in net position. The balances of these items have been adjusted to reflect these changes as of December 31, 2024.

Notes to the Schedule of Contributions

Valuation Date

Actuarially determined contribution rates are calculated as of January 1 of odd numbered years. The contribution rates have a one-year lag, so the actuarial valuation as of January 1, 2023, determines the contribution amounts for 2023 and 2024.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Open*
Remaining Amortization Period	20 Years*
Asset Valuation Method	5-Year smoothed fair-value
Inflation	2.50%
Salary Increases	N/A
Rate of Return	7.00%
Retirement Age	50% per year of eligibility until 100% at age 65
Mortality	Pre-retirement 2006 central rates from the RP- 2014 Employee Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales and then projected prospectively using the ultimate rates of the scale for all years, 50% multiplier for off-duty mortality
	Post-retirement 2006 central rates from the RP- 2014 Employee Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales and then projected prospectively using the ultimate rates of the scale for all years.
	Disabled 2006 central rates from the RP- 2014 Employee Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales and then projected prospectively using the ultimate rates of the scale for all years.

* Plans that are heavily weighted with retiree liabilities use an amortization period based on the expected remaining lifetime of the participants.
